Dental Assistant Renovation**

BID ADDENDUM 6 – Work to be Revised or Deleted from 1st Bid Set
May 29, 2025

This project is currently over budget and the scope of work must be reduced and revised to get the project under budget. The following changes from the 1st Bid Set apply to the 2nd Bid Set.

1. The College has arranged for sections of the existing classroom ceilings on the Ground Floor to be removed to permit bidders to look above those ceilings at the Pre-Bid walk-through to get a better understanding of the options for installing the new underfloor plumbing and electrical services.
2. Delete all reference to relocating the electrical panel DP. The panel will still need to be updated including removing all circuits noted to be deleted and adding all new circuits as indicated, but the panel can stay in its current location.
3. Include replacing the suspended ceiling tiles in all the renovated areas but leave all the existing suspended ceiling grid and existing light fixtures. The College will update the existing light fixtures under a different budget.

Bidders are encouraged to add a separate sheet along with their bid to list any revisions or deletions they can suggest for the College's consideration to reduce the project cost, beyond those items already listed in the 2nd Bid Addendums.
