Re: IMPORTANT CONTRACT/BID ADDENDUM #2

IFB# 83-CFCC-2023-0625: Elevator Services

THIS ADDENDUM MUST BE SUBMITTED WITH BID

Addendum includes the following edits/clarification:

- Section 1.0 Purpose and Background, Section 5.0 Scope of Work, Section 5.2 Tasks/Deliverables, and Attachment A: Pricing have been edited to omit one (1) Dala orchestra pit lift located in WA building and to confirm the total number of units is thirty (30).
- Updated Attachment A: Pricing
- List of Completed 5 Year Tests on Units
- Responses to vendor questions

Sincerely,

Liz Mantooth

Liz Mantooth Director of Purchasing & Inventory <u>Imantooth@cfcc.edu</u> 910-362-7067

List of Completed 5 Year Tests. "N/A" do not require 5 year testing, only annual testing. **Traction elevators**: require 5 yr test **Hydraulic elevators**: 5yr test not required

Section Reference	Vendor Question	CFCC Response
	Who is the incumbent service provider?	Charter Elevator Tidelands
	What is the current contracted yearly price for elevator services rendered? Are you able to provide the bid tabulations from the most recent IFB?	Current contract is \$4162 per month including tax.
Section 5.1,b, p. 14:	The three elevator units located in the Hanover Parking Deck were observed to have rusted/damaged hoist ropes. Will these items be repaired prior to the bid award? If not, will the college permit the awarded vendor to exclude these components from the coverage defined in section 5.0? We ask that a pre-existing condition repair proposal be provided to CFCC upon bid award.	One machine has had it's ropes replaced. We would not expect the ropes on the other two to be replaced under this contract.
Section 5.1,b, p. 14:	Should any repair/replacement components be defined as obsolete from the OEM and/or certified equipment vendor, will these components be considered "excluded" from the scope of coverage listed on this IFB?	CFCC has dealt with this in different ways, including paying for upgraded improved parts as extras to the contract, accepting substitute parts, non OEM parts, manufacturer refurbished parts etc. as the situation requires.
Section 5.1.e, p. 14:	Does the State and/or College require annual and five year safety testing for the unit coded as "WA Wilson Center Orchestra Pit Lift"? This is the big stage lift in the Wilson Center.	We require what the NCDOL requires and the Manufacturer recommends. However, this unit has been omitted from the IFB Scope of Work and pricing sheet. See addenda.
Section 5.1.f, p. 15:	What are the existing contracted hourly labor rates for elevator services rendered outside of the scope of work as defined in this IFB?	Not applicable, this contract does not involve paying for hourly work. In the event we contract for work outside of this contract, it will be lump sum priced.
	How much does CFCC currently pay per month (or annually) for elevator services?	Current contract is \$4162 per month including tax.
	How much has CFCC spent on items not covered under the current contract in the last 12 months? How about the last 24 months? (i.e. non-covered repairs, upgrades, open order, etc)	I do not believe this is relevant to this proposal response. We do budget for repairs beyond the scope of this service contract when they occur.
	How many callbacks has CFCC had in the last 12 months?	CFCC unable to answer this question effectively due to clarity. Vendor will be contacted in the period reserved for clarification from vendors outlined in Section 3.3 Bid Evaluation Process
	How many overtime callbacks has CFCC had in the last 12 months?	CFCC unable to answer this question effectively due to clarity. Vendor will be contacted in the period reserved for clarification from vendors outlined in Section 3.3 Bid Evaluation Process

	Can you provide a list of when the last 5- year tests were completed on each of the elevators?	Included in addenda
	Are 5-year safety tests included in the scope of work?	Yes, when due.
	What is the current elevator contractor's hourly labor rate for services during regular and overtime hours?	Not applicable, this contract does not involve paying for hourly work. If we contract for work outside of this contract, it will be lump sum priced.
	If a repair or modernization is needed, what is the monetary threshold before it goes out to bid?	CFCC attempts to negotiate any work not covered under the contract with our service contractor. We have only had to have work done by other contractors in cases of proprietary systems. An elevator replacement or modernization would be a separate competitively purchased project.
Attachment A: Pricing sheet	The column on the right side asks for a "monthly cost". At the bottom it asks us to total line items 1-11 for a "total annual cost". Please confirm if you want annual or monthly pricing.	CFCC attempts to negotiate any work not covered under the contract with our service contractor. We have only had to have work done by other contractors in cases of proprietary systems. An elevator replacement or modernization would be a separate competitively purchased project.
	Some of the "Item No." include multiple elevators. Do you want the "monthly cost" to reflect a "per elevator price" or the total for all elevators in the section?	All elevators in the section.
	Who will be responsible for any pre- maintenance repairs?	CFCC unable to answer this question effectively due to clarity. Vendor will be contacted in the period reserved for clarification from vendors outlined in Section 3.3 Bid Evaluation Process
	Will the awarded vendor be given the chance to identify any pre-existing conditions and provide CFCC with a proposal to make the necessary repairs?	Awarded vendor is welcome to assess and propose any repairs. We already have an excellent understanding of the maintenance/repair/cleanliness status of our equipment. Repair offers do not alleviate the requirement that equipment be serviced.
	If the awarded vendor is unable to satisfy the RFP requirements due to obsolescence of an existing component, will such obsolete items be excluded from the scope of this agreement?	CFCC has dealt with this in different ways, including paying for upgraded improved parts as extras to the contract, accepting substitute parts, non OEM parts, manufacturer refurbished parts etc. as the situation requires.
Pg 5- Purpose & Background	"Purpose and background" states there is a total of 33 units. On Page 13 under "Scope of Work" it states there are 31 units (26 elevators, 4 WC lifts, 1 orchestra lift). The bid form on Page 20 lists a total of 33 units. Can you confirm if the total is 33 or 31?	Edits/clarifications have been made in IFB, and noted in the addenda
