1.2 Background

The City of Raleigh, the Capital City of North Carolina, remains one of the fastest growing areas in the country. A great economy, top educational institutions, and exceptional health care facilities are some of the characteristics that attract people to the triangle area. The mild climate, diverse work force and proximity to Research Triangle Park combine to make Raleigh a great place to live.

Raleigh is a 21st Century City of Innovation focusing on environmental, cultural, and economic sustainability. The City conserves and protects our environmental resources through best practice and cutting-edge conservation and stewardship, land use, infrastructure and building technologies. The City welcomes growth and diversity through policies and programs that will protect and enhance Raleigh's existing neighborhoods, natural amenities, history, and cultural and human resources for future generations. The City leads to improve quality of life for neighborhoods and standard of living for all citizens. The City works with universities, colleges, citizens, and local partners to promote new technology, create new job opportunities, and encourage local businesses and entrepreneurs. The City enlists and prepares 21st Century staff with the skill sets to carry out the duties of the City through transparent civic engagement and by providing the very best customer service to our citizens.

The City of Raleigh Public Utilities Department, now also known as Raleigh Water, provides water and sanitary sewer services to about 198,000 metered customers and a service population of about 600,000 people in Raleigh, Garner, Wake Forest, Rolesville, Knightdale, Wendell and Zebulon areas. Raleigh Water currently operates three wastewater resource recovery facilities, Neuse River Resource Recovery Facility (NRRRF), Smith Creek RRF

(SCRRF), and Little Creek RRF (LCRRF), and two water treatment plants, E.M. Johnson WTP and D.E. Benton WTP.

The NRRRF is a 75 million gallons per day (MGD) advanced biological nutrient removal (BNR) wastewater treatment facility. SCRRF and LCRRF are both advanced nutrient removal wastewater treatment facilities utilizing oxidization ditch with a permitted capacity of 3 MGD and 2.2 MGD, respectively.

The E.M. Johnson WTP receives water from the Falls Lake Reservoir, which impounds water from the Neuse River. The permitted capacity of the plant is 86 MGD. D.E. Benton WTP has a maximum total treatment capacity of 20 MGD. The D.E. Benton WTP withdraws water from Lakes Benson and Wheeler.

The North Carolina General Assembly appropriated funds from the state's allocation of the American Rescue Plan Act (ARPA) for water utility investments. North Carolina Department of Environmental Quality (NC DEQ) will administer a portion of the funds as grants for planning studies for asset inventory and assessment (AIA).

The City has been awarded \$400,000 in grant funding from NC DEQ for an AIA study to complete a comprehensive in-field collection of condition assessment data for critical vertical assets at the Water Treatment and Resource Recovery Facilities. There is no required match for this grant.

North Carolina, or any elected official in connection with obtaining a contract as a result of this RFQ.

1.11 Conflicts of Interest

City of Raleigh contracts are controlled by three conflict of interest provisions.

First, federal procurement standards provide in 2 CFR 200.318 (c)(1),

No employee, officer, or agent may participate in the selection, award, or administration of a contract supported by a Federal award if he or she has a real or apparent conflict of interest. Such a conflict of interest would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated herein, has a financial or other interest in or a tangible personal benefit from a firm considered for a contract. The officers, employees, and agents of the non-Federal entity may neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or parties to subcontracts.

Similarly, the North Carolina General Statutes provides a *criminal* statute for conflicts of interest in public contracting, N.C.G.S. § 14-234(a) states:

(1) No public officer or employee who is involved in making or administering a contract on behalf of a public agency may derive a direct benefit from the contract except as provided in this section, or as otherwise allowed by law. (2) A public officer or employee who will derive a direct benefit from a contract with the public agency he or she serves, but who is not involved in making or administering the contract, shall not attempt to influence any other person who is involved in making or administering the contract. (3) No public officer or employee may solicit or receive any gift, favor, reward, service, or promise of reward, including a promise of future employment, in exchange for recommending, influencing, or attempting to influence the award of a contract by the public agency he or she serves.

City of Raleigh Charter Section 3.9 regulates private transactions between the City and its officials and employees. The Charter states:

No member of the City Council, official, or employee of the City of Raleigh shall be financially interested, or have any personal beneficial interest, either directly or indirectly, as agent, representative, or otherwise, in the purchase of, or contract for, or in furnishing any materials, equipment or supplies to the City of Raleigh, nor shall any official or employee of the City of Raleigh accept or receive, or agree to accept or receive, directly or indirectly, from any person, firm or corporation to whom any contract may be awarded or from whom any materials, equipment or supplies may be purchased by the City of Raleigh, by rebate, gift, or otherwise, any money or anything of value whatsoever, or any promise, obligation or contract for future reward or compensation, for recommending or procuring the uses of any such materials, equipment or supplies by the City of Raleigh; no member of the City Council, official or employee of the City of Raleigh shall for his own personal benefit operate, directly or indirectly, any concession in any building or on any lands of the City of Raleigh, nor shall any official or employee of the City of Raleigh bid for or be awarded any contract granting concessionary rights of any nature or kind from the City of Raleigh; it shall be unlawful for any member of the City Council, official or employee of the City of Raleigh to bid for or to purchase or to contract to purchase from the City of Raleigh any real estate,

equipment, materials, or supplies of any nature or kind whatsoever, either directly or indirectly, at either public or private sale, either singly, or through or jointly with any other person.

The City of Raleigh will not be responsible for any expenses incurred by any Firm in the development of a response to this Request for Qualifications or any other activities associated with this procurement including but not limited to any onsite (or otherwise) interviews and/or presentations, and/or supplemental information provided, submitted, or given to City of Raleigh and/or its representatives. Further, the City of Raleigh shall reserve the right to cancel the work described herein prior to issuance and acceptance of any contractual agreement/purchase order by the recommended Firm even if the awarding authority for each entity has formally accepted a recommendation.

1.13 Proposer Acceptance

Submission of any proposal indicates a Proposer's acceptance of the conditions contained in this RFQ unless clearly and specifically noted otherwise on the Exceptions to RFQ (see Appendix V) and submitted with proposal. The City of Raleigh has the sole discretion and reserves the right to cancel this RFQ, and to reject any and all proposals, to waive any and all informalities and/or irregularities, if it is deemed to be in the City of Raleigh's best interests to do so. The City of Raleigh reserves the right to accept or reject any or all of the items in the proposal, and to award the contract in whole or in part and/or negotiate any or all items with individual firms if it is deemed in the City of Raleigh's best interest. Moreover, the City of Raleigh reserves the right to make no selection if proposals are deemed not in the best interest of the City.

As such, Federal laws, regulations, policies, and related administrative practices apply to this contract. The City will give the contracted firm written notice of its intent whether to exercise each option no later than 30 days before the end of the Contract then-current term. In addition, the City reserves the right to extend a contract term for a period of up to 180 days in 90-day-or-less increments.

4 SCOPE OF SERVICES

Awarded firm shall provide services, all as set forth in this RFQ and more particularly described in this Section 4.

This project will continue the development of the Raleigh Water Asset Management Program through a comprehensive in-field collection of condition assessment data for critical vertical assets at the Water Treatment and Wastewater Resource Recovery Facilities. The City recently implemented a new Computerized Maintenance Management Software (CMMS) and asset inventory using Cityworks for its Water Treatment and Resource Recovery Facilities and finished updating risk scoring for these assets as part of its Integrated Master Plan. With these developments, the City's primary focus for its vertical asset management now shifts to condition scoring of these crucial assets.

This RFQ is for two similar projects with separate funding sources. The two funding sources are separating the water and wastewater facilities.

The project scope consists of three tasks:

Condition Data Gap Analysis:

- Analyze current vertical asset condition assessment data gathered by the City at the Water Treatment Plants and compare current strategy with best practice for condition assessment of each asset class.
- Develop a strategy for populating missing asset data (installation date, etc.)
- Provide recommendations for ongoing condition assessment data collection tailored to asset class and criticality.

Field Condition Assessment:

- Perform physical condition assessment and performance condition assessment for critical assets.
- Populate Condition assessment data within CMMS.

Predictive Analytics:

- Explore options for utilizing SCADA data and machine learning techniques to use data from a variety of sensors to identify and/or predict asset failure of critical assets.

Asset management is critical to ensuring that utilities can identify when and where to invest in maintenance and replacement to ensure high quality operation and regulatory compliance. This project will allow Raleigh Water to reduce the likelihood of costly asset failures while also optimizing expenditures on asset maintenance.
