- Shipping/freight to 28306 (facility has a loading dock **and freight should be unloaded at loading dock by delivery driver**)
- Provide estimated lead time – **chairs are needed as soon as possible**
- Any additional required fees

2. Questions/Answers

1. Do you have a chair of the chair you are interested in? Are you trying to match existing chair styles?

The current and preferred chairs are MTS Seating Model 505SB Alpha Banquet Stacking Chairs in Grade 6/Rebel/Abyss RBL511 with satin black powdercoat frame finish, stack bars, and welded wire ganger. An equivalent that meets the same minimum requirements will be acceptable.

2. For the delivery are we just dropping off in the loading dock or is it expected to setup all 1200 chairs or leave in stacks at the loading dock?

Dropping off on loading dock.

3. Do you want rolling dollies to hold the chairs when they are stacked? There is no specification for a cart for the chairs? They stack 17 per cart and that is 71 carts added to the order?

No dollies are needed. We are reusing the dollies we have.

4. Can you also provide us with how soon you would need them? If it is ASAP or if 1-3 months is acceptable?

The chairs are needed as soon as possible.

5. Do you have a model number in mind? I would recommend a handhold for the people that do stacking and unstacking plus the fabric style in better shape. There are many styles, is lowest price what Cumberland wants?

The current and preferred chairs are MTS Seating Model 505SB Alpha Banquet Stacking Chairs in Grade 6/Rebel/Abyss RBL511 with satin black powdercoat frame finish, stack bars, and welded wire ganger. An equivalent that meets the same minimum requirements will be acceptable. Yes, a handhold is needed. We would like the lowest price that meets all requirements of the IFB.

6. You mention "welded ganging device". There are certain fire codes which dictate the type of ganging device to be used. Please tell me if you want fixed or retractable ganging devices. Both will be welded but there is a difference in cost between the two. Again, this is dictated by the fire codes in effect in the municipality.

Stationary/fixed welded gangers are needed.

7. Do you have a specific grade of upholstery you are looking for? There is an abrasion rating given for vinyl and/or fabric. There are many options and some manufacturers use the lowest possible grade in order to reach a certain price.

Grade 6.

8. Do you have a picture/model # of the chair that you would like quoted?

The current and preferred chairs are MTS Seating Model 505SB Alpha Banquet Stacking Chairs in Grade 6/Rebel/Abyss RBL511 with satin black powdercoat frame finish, stack bars, and welded wire ganger. An equivalent that meets the same minimum requirements will be acceptable.

9. Is there a specific vinyl style/pattern you want quoted?

Textured/cold crack.

10. Do you know what type of floor glide you need? If not, to determine the type of glide that will be needed, can you let us know what type of flooring the chairs will be used on?

Nylon floor glides with protective boot and stacking bumper.

11. Can we offer bids on more than one chair style?

Yes, as long as the bids meet the requirements of the IFB.

12. Is standard delivery requested (customer unloads) or do you need an inside delivery/white glove service?

Freight should be unloaded at loading dock by delivery driver. We will take it inside.

13. What type of floor glides are required – nylon or metal?

Nylon floor guides with protective boot and stacking bumper.

14. Given that our hand trucks and chairs are manufactured to be compatible with each other, should we include hand trucks on the quote, and if so, how many?

No hand trucks are needed. We are reusing dollies that we have.

15. Is delivery to dock, or is inside delivery required?

Delivery should be unloaded at loading dock by delivery driver. We will take it inside.

16. Is Crown Complex tax exempt?

Cumberland County is not tax exempt. Please list sales tax separately in your bid.
