- The following are questions received about the Solicitation and the State's response to those questions:

Question #	Document Section	Vendor Question	State's Response
1	Section 4.5 Delivery	Can more than 1 response be given to "within ___ consecutive delivery days" when bidding multiple machine models in a single category that have different lead times?	No. If there are multiple delivery days for multiple machine models within a specific single category, please use the maximum number of days for all models, in that category.
2		We will be bidding equipment with truck chassis. Will exceptions be allowed for supply chain issues that may occur outside of the bidder's control?	Yes, but this will depend on the exception, which will be determined upon review. We understand supply chain issues but expect the research to be done to project pricing.
3		Will camera trailers be beneficial to this specific project? I want to verify before placing a bid.	No STC4616A has camera trailer awarded.

Question #	Document Section	Vendor Question	State's Response
4	Section 6.10 Price Adjustments	The percentage Discounts is very specific, and I understand the 2 year lock in. However, will you expand on and verify that the MSRP from my Manufactures are not locked in and can change at their needs. I did not see any language regarding the MSRP Cost adjustments or any lock in the bid Document. (They also want to make sure they are not locked in for a period of time)	Please see Section 6.10 Price Adjustments. MSRP pricing is not locked in. Vendors are able to provide updated published MSRP pricing, as pricing is updated, for the purpose of maintaining "published Current MSRP". Percentage Discounts off of published current MSRP is locked in for a period of two (2) years.
