This addendum addresses the following:

Response to Vendor Questions:

Vendor Question	GTCC Response
The IN1804 Switchers do not have their exact model numbers specified, but imply they should be HDBaseT compatible, please confirm that this should be Extron Part Number: 60-1699-13 IN1804 DTPO so that an additional separate transmitter is not needed.	IN1804 DO is the correct version.
The Epson Short throw projectors HDBaseT inputs cause problems when used with anything other than their own control panel, please confirm that an Extron DTP HDMI 4K 230 RX 60-1271-13 is needed for each shorty throw room.	Yes, the receiver will be needed.
Is the State willing to negotiate terms and conditions after award? (2.8 Notice to Vendors reads "The State objects to and will not be required to evaluate or consider any additional terms and conditions not previously agreed to by the State and submitted with an Offeror's response.")	As stated in the RFP, GTCC is not obligated to review or consider any additional terms and conditions submitted. However, vendors may include proposed modifications to the Department of Information Technology Terms and Conditions in their RFP response, and GTCC will evaluate these requested changes along with the overall RFP submission. GTCC cannot determine its willingness to consider any proposed modifications until they have been reviewed.
Section 2.9 reads, "This is an E-Procurement solicitation. See Paragraph #47 of the attached Department of Information Technology Terms and Conditions"; however, Paragraph #47 reads "RESERVED". Would the State please confirm this is an e-Procurement contract subject to the 1.75% e-Procurement fee?	This is an e-Procurement solicitation. The 1.75% fee only applies to goods and does not apply to any services.
How many option years of service would they like past the first year of support?	Only the first year of support is required. While we appreciate and welcome any additional information regarding subsequent years of service, it will not be a determining factor in our decision-making for this bid.
Extra Equipment for W4 100 Rotunda: Can you please supply a desired make and model number for "Wall Input Panel with HDMI and Bluetooth Inputs"	The End User is not concerned about the brand or type as long as it functions properly. Several manufacturers are acceptable, and they all meet the required standards.

Following the pre-bid meeting last week, the End User re-evaluated the number of Parle microphones required for CADM 1536 and 1537. It has been confirmed that only 4 microphones are needed in each room. Consequently, the Furnish and Deliver table has been updated to reflect this requirement and shall replace the Furnish and Deliver table in the original RFP. The updated Furnish and Deliver table begins on page 3.

By providing signature on the next page, the vendor is indicating that they have reviewed the question(s) and answer(s) for IFB/RFQ No. 99-MP23057. ***This Addendum should be signed and returned with the IFB/RFQ package.***

FURNISH AND DELIVER

The proposed equipment and services listed in the below pricing table was evaluated by GTCC's ITS Audio-Visual Department which determined the features and performance of the requested system, equipment and services were deemed necessary for instruction.

Except where identified as *Brand Specific*, manufacturer's names and model/catalog numbers used are for the purpose of identification and to establish quality level desired.

This pricing table is for informational and reference purposes however, **Vendors should use this format for submitting their itemized pricing for equipment and services**. In addition to this pricing table, Vendors should include a separate quote with their IFB submission. It is expected that equipment and services may vary depending on each Vendors proposed system solution. Vendors are requested to offer only comparable equipment which will provide the features and performance to meet the requirements and specifications listed in ATTACHMENT A.
