

# TOWN OF CARY

## REQUEST FOR QUALIFICATIONS – DESIGN OF AERATED SLUDGE SLUDGE HOLDING TANK

RFQ #354-UT25-38

ADDENDUM NO. 2

ISSUED JUNE 25, 2025

**Below are the Answers to the Questions received as of June 25, 2025. Please incorporate this information into your Proposals.**

1. Previous projects we have been able to work with Cary to negotiate acceptable terms and conditions based on the Town's standard Agreement for Professional Services. Will there be an opportunity to do that for this project?

**Cary's standard contract language is included in the RFQ package. Firms shall include any desired terms and condition revisions with the submittal package. Failure to notify Cary of desired contract revisions at time of response submission may deem the proposer unresponsive.**

2. Can the Town please share the WWRWRF process flow diagram and the master plan report (if available)? In addition, can the Town share the yard piping plan for the proposed site for the new storage tank?

**Cary will provide existing diagrams and master plans to the selected consultant upon selection of firm.**
