Land Use and Environmental Services Agency

REQUEST FOR PROPOSAL

Proposals will be received until **2:00 PM on January 22, 2024**, for Rapid Flood Forecasting.

Charlotte-Mecklenburg Storm Water Services (CMSWS) is requesting proposals to add a "RARR Forecast" to our existing inundation mapping products. CMSWS desires to contract with a firm that can demonstrate extensive experience and expertise in flood forecasting modeling. The selected firm will be expected to consistently deliver high quality work within schedule and budget. It must produce a dependable stage forecast that can be run up to 12-hrs before an event, and at routine intervals during a storm event (ideally at the same time as RARR Now). The project budget for the initial setup and deployment is \$250,000 and cost will be a factor in the selection.

A digital copy of the Request for Proposal may be obtained on eVP or by contacting the following:

Mathew C. Hornack, PE, CFM
Mecklenburg County LUESA
Storm Water Services
Mathew.Hornack@mecklenburgcountync.gov
2145 Suttle Avenue
Charlotte, NC 28208
FAX (704) 335-2253

All questions regarding this project should be directed to Mr. Hornack in writing, by FAX, or by email. Questions will be accepted until January 8, 2023, at 2:00 PM. All questions and associated answers will be compiled into an addendum and posted to eVP by January 12, 2023. In order to maintain equal access to information, firm representatives are not to contact anyone other than the individual named above.

Complete instructions for submitting a proposal are found in the RFP.

The Owner reserves the right to waive any informality in or to reject any or all Proposals if deemed to be in its best interest.
